

A Journey To Move Business Beyond Bias

A century ago the world looked very different

1900

15% of global workforce was female, resulting in a loss of 17% Global GDP

Average life expectancy: 32 years

Population: 1.6 Billion

Industrial Revolution

Here's how it looks today

2016

40% of global workforce is female

Average life expectancy: 69 years

Population: 7 Billion

Digital Revolution

The workforce is changing, but not fast enough

4% of Fortune 500 CEOs are women

1% of Fortune 500 CEOs are people of color

25% of IT jobs globally are held by women

22% of all parliamentarians are female

By 2020 50% of workers will be Millennials

By 2020 25% of workers will be over 55

66% of entry level employees hired at Wall Street's biggest firms in 2014 were white; over 75% were male

Now Imagine a World Beyond Bias

Where diverse genders, nationalities, and generations participate fully in an inclusive, modern workforce for the digital era

- Companies with more **diversity** in leadership have better **financial performance**
*Diversity Matters, McKinsey and Company report, Feb 2015
- \$12 Trillion** could be added to the global GDP by 2025 by advancing women's equality
*Diversity Matters, McKinsey and Company report, Feb 2015
- Companies that embrace pro-LGBT policies **perform better** in the stock market
*Credit Suisse ESG Research 2016
