

SAP Customers Participating in SME Summit

A number of SAP SME customers are scheduled to participate in today's [SME Summit](#), highlighting benefits they have gained from implementing SAP solutions:

- [Emprego Ligado](#) is one of the first and only mobile jobs marketplaces for Brazil's working class, measured at 85 percent of the country's labor force. Focused on connecting unskilled laborers in Brazil to jobs close to home via SMS, it is leveraging logistical and technological inefficiencies that can choke productivity, transit and social progress in the region. With SAP Business One, expert mentors, and access to the SAP ecosystem of customers and partners, the company is set for sustainable economic growth.
- [Fundação Eugenio de Almeida](#) together with partner RISA Consulting will present RISA's Wine One solution tailored for the famous wine industry of Portugal. The solution it has deployed is built on SAP Business One, version for SAP HANA 9.1.
- [Golden Road Brewing](#), based in Los Angeles, is one of the fast-growing breweries in the U.S. It is investing for growth with SAP Business One, moving from spreadsheets and manual reports to the cloud. Golden Road is using the customized cloud-based system OrchestratedBEER, based on SAP Business One, from partner Orchestra Software. The solution builds transparency into data management, delivering a single version of data and real-time answers to mission-critical questions.
- [Lynch Fluid Controls Inc.](#), a custom hydraulic motion control manufacturing business based in Mississauga, Canada, has grown significantly since implementing SAP Business All-in-One two and a half years ago. The company is now selling to customers in over 50 countries worldwide, and attributes much of its growth to the successful benefits it has achieved from the use of SAP Business All-in-One.
- [WL Plastics Corporation](#) manufactures high-performance, high-density polyethylene (HDPE) pipe and related products for the oil, gas, mining, industrial and municipal water markets. With the help of partner Navigator Business Solutions, WL Plastics has been using SAP Business ByDesign for over four years to efficiently run a number of its manufacturing operations.
